

DISINFECTION COMPETITION ANALYSIS

THE COMPETITION: WHAT THEY OFFER

- Primary focus on 'cleaning' and 'sanitization'
- Janitorial 'cleaning' disinfectants
- Standard Electrostatic sprayer, pump, or battery sprayer
- Standard PPE for employees
- Standard PPE for technicians
- Disinfection of high-traffic hard surfaces
- Additional fees for initial cleaning (if needed, before disinfection)
- Basic maintenance and equipment training for businesses
- Basic education on how viruses can infect individuals and workplaces

THE AMPOL DIFFERENCE

- ✓ **Certified 'disinfection' services** *plus* sanitization and remediation clean-up
- ✓ **Hospital grade EPA disinfectants**
- ✓ **Industrial grade electrostatic sprayers**
- ✓ **All levels of PPE** available for employees
- ✓ **EPA approved PPE** for Technicians
- ✓ **Certified Disinfection of high-traffic hard AND porous surfaces**
- ✓ **No prior cleaning required**
- ✓ **Advanced maintenance and equipment training** for businesses
- ✓ **Advanced education and resources** on how to protect and prevent virus recurrence in the workplace

What AMPOL offers that the OTHERS Do Not

- Industrial HEPA vac and steam cleaning of porous materials (curtains, carpet, furniture, etc.)
- State-of-the-art UV disinfection technology to kill airborne particles of the virus (combats and prevents virus infection)
- Rapid ATP testing (testing of all surfaces for contamination levels to ensure medical grade cleanliness)
- Certified industrial hygienist supervision at all sites to ensure medical association standards
- Rapid COVID-19 testing on hard surfaces with data-backed results for compliance
- Post disinfection certification providing client with verified & stamped documentation of 99.9% virus-free facility
- Rapid COVID-19 testing of client employees and AMPOL technicians
- Proven track-record of environmental remediation (Hurricane Katrina), disaster clean-up (BP Oil Spill), and EPA certified disinfection standards (Anthrax)
